

The Canadian Federation of Agriculture (CFA) is committed to harnessing the power of data for the benefit of our members. We are excited to unveil the Agrilnsight Dashboard, an exciting tool designed to provide our members with up-to-date data to assist their advocacy, policy and communications.

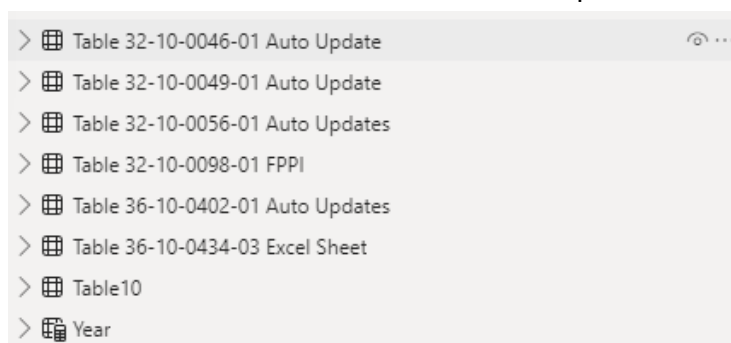

With a sharp focus on Farm Financial Health, Agrilnsight provides you with unparalleled access to over 100 million auto-updating data points. Equipping you with the latest insights and statistics around farm finances.

### How to Update and Maintain Agrilnsights - CFA Data Dashboard

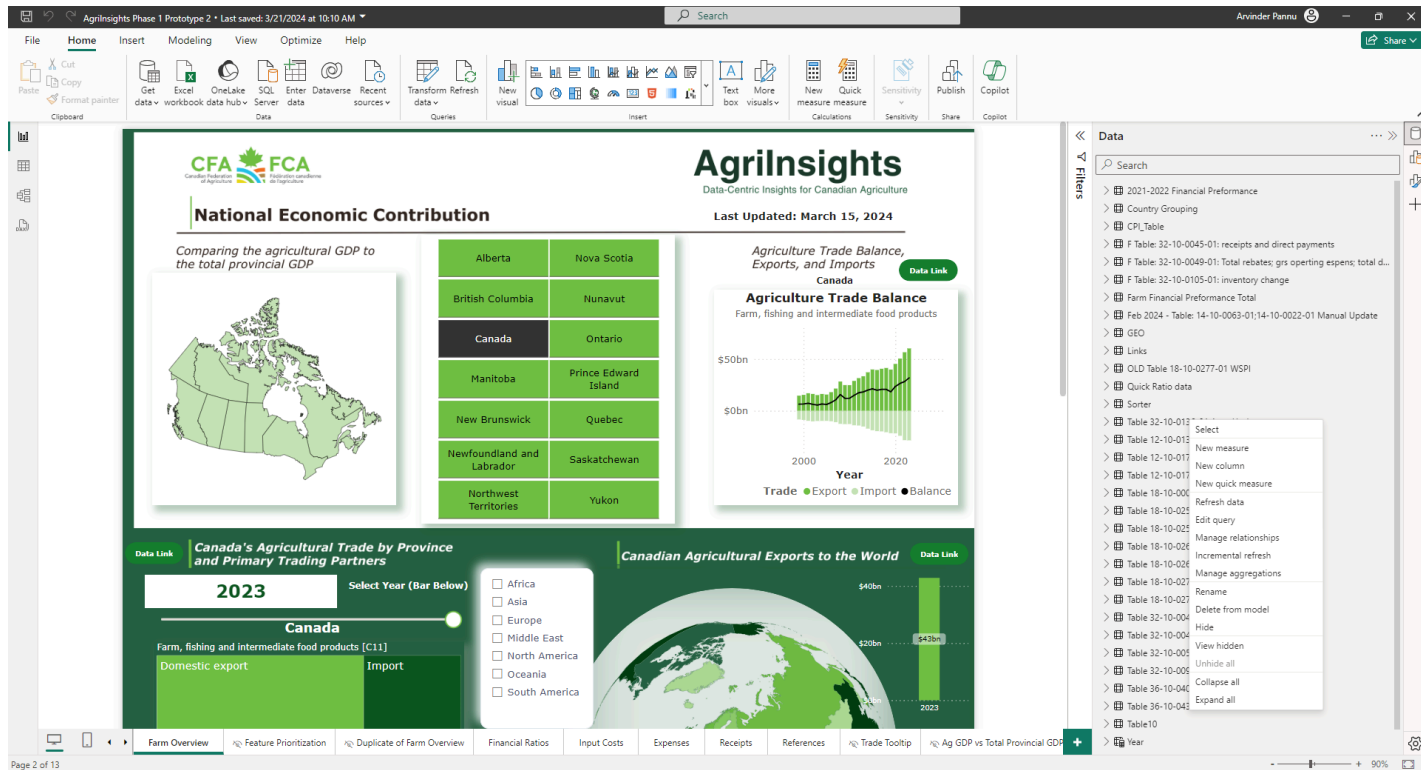

- **Download PowerBi Desktop.**
- **Load report.**
- **Click through all report pages located at the bottom (7 total)**

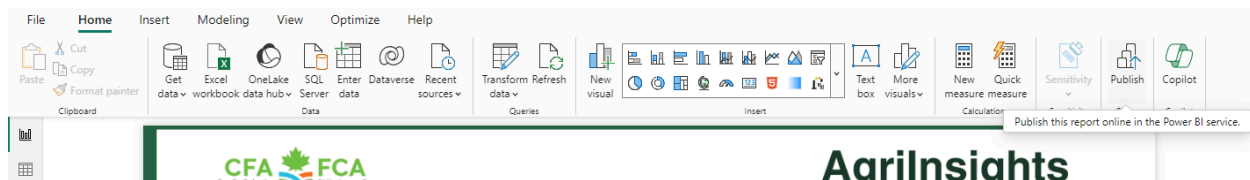

- **There are 16 total visuals that need updates**
  - Tables are labeled to show whether they Auto Update, require manual updates, and the remaining are filters or categories (e.g., location, year, order, etc.) which do not need updating.
  - View visuals that need data updates in the Section below

- **If a manual update is required, go to the excel sheet on sharepoint, copy the data from the Data link in the dashboard, save the excel, and then right click the dataset in Powerbi to update.**

- Once the update is complete, click publish on the top banner

- The Dashboard will update on CFA website automatically
